

<b>Program Code</b>	OMDP19P03
<b>Title Of the Program</b>	Lean Thinking
<b>Date of the Program</b>	3 - 4 May 2019
<b>The Lead Faculty</b>	Dr. Jitendra Sharma
<b>Objective</b>	The program is designed to assist the organization and the participant to gain an understanding of the underlying behavior of the processes and how to make improve them using lean approach to make them more effective and efficient.
<b>Description/Content</b>	Lean is a method to improve industrial and administrative processes. Striving for an optimal flow is therefore the fundamental principle of Lean. Lean concentrates on maximizing the value which 'streams' towards the customers, and it traces and eliminates waste. This is done by gearing the steps which add value to any process, and by eliminating steps that don't add value. Since lean has already achieved a lot of success in the field of manufacturing, it is now becoming very popular in service industries of different nature and has evolved itself from lean manufacturing to lean thinking. The program will have an overview of lean thinking concepts, capabilities and limitations. Foucs will be on Toyota Production System and their waste reduction technique, a gold standard in operations. Lean elements like Poka yoke, JIT, Jidoka, Kaizen, 5S, etc. will be covered. Main focus will be on division of activities into value add, non-value add and required non value add.
<b>Target Group</b>	For middle to high level corporate executives of both manufacturing and/or service sector, especially for those who would like to see radical improvements in efficiency and productivity of their department/organization. This program is also suitable for the entrepreneurs and CEOs of SMEs.
<b>Takeaways</b>	The participants would be able to: <ul style="list-style-type: none"> <li>• Understand the basic philosophy of lean thinking</li> <li>• Appreciate the purpose, utility and capability of various tools and techniques</li> <li>• Utilize and implement these tools and techniques in their organization</li> </ul>
