

Program Code	OMDP19P04
Title Of the Program	SOFTWARE PROJECT MANAGEMENT
Date of the Program	MAY 10-11,2019
The Lead Faculty	Dr.Parijat Upadhyay
Objective	The objective of this program is to equip the participants with theoretical and practical knowledge required for managing a technology and software project.
Description/Content	The participants having exposure to software projects will be provided practical knowledge for effectively managing a technology and software project. They will be imparted training on necessary techniques which can serve as the necessary link between technical and non-technical roles in an IT organization. The participants will be sensitized about project risks and risk management techniques. The program will be based on guidelines of PMBOK.
Target Group	The Technological Project Management course is specifically designed to augment the knowledge base of participants who have a background in IT industry but going forward must master concepts which combines project management foundations, techniques and hands-on learning.
Takeaways	After completing the course, the participants should be able to appreciate the crucial role of Software Project Management in their managing IT projects successfully. They will have a richer understanding of the PMBOK guidelines and can later attempt PMP certification. Hands-on session on MS-Project will enable them to effectively track and monitor those projects which the participants might be leading.
Pedagogy (tools and techniques etc.)	Teaching methods would include class-room lectures, discussion of case-studies on software project management and hands-on training on MS Project Software.
