**About IMT Nagpur**

Having been set up in 2004, IMT Nagpur has successfully achieved the recognition of being one of the most well-known premier B-Schools in the country. Ranking among the top half percent of the B-Schools in India, IMT Nagpur, in its 27 acres of lush green campus in the midst of the nature, has the unique amalgamation of faculty, technology, curriculum and diverse cultural environment to equip its students to face and lead the complexity of dynamic business environment. The institute could attain the reputable position in the management education by following a holistic approach in providing the priming ground to budding business leaders.

**About ATAL Academy:**

AICTE Training And Learning(ATAL) Academy AICTE is committed for the development of quality technical education in the country by initiating various schemes launched by Govt. of India, Ministry of Human Resource Development. The Council understands that it is the need of the day to train the young generation in skill sector and faculty & technicians in their respective disciplines. To keep an institute competitive and more productive, faculty training on the latest tools and technologies is vital. Training is required for increasing the knowledge and skills of students to make them more employable to acquire global competencies.

## About the course:

Operations management is concerned with the design, management, and improvement of the systems that create the organization's goods or services. It is an important functional area because it plays a crucial role in determining how well an organization satisfies its customers. The key factors for survival and performance excellence in any industry are customer satisfaction and return on investment. This applies to both manufacturing and service sectors. The ideal situation for a business organization is to achieve a match of supply and demand. Having exceed supply or excess capacity is wasteful and costly; having too little means loss of opportunity and possible customer dissatisfaction. The industry should aim for excellence in their performance to survive and excel both in the manufacturing as well as in the service sector.

## Program Objective:

The objectives of the program is to impart knowledge tools and techniques in the field of operations management.
