## Faculty Development Program on Pedagogical Excellence in Management Class

**Date : October -26-30, 2020**

---

### About IMT Nagpur

Having been set up in 2004, IMT Nagpur has successfully achieved the recognition of being one of the most well-known premier B-Schools in the country. Ranking among the top half percent of the B-Schools in India, IMT Nagpur, in its 27 acres of lush green campus in the midst of the nature, has the unique amalgamation of faculty, technology, curriculum and diverse cultural environment to equip its students to face and lead the complexity of dynamic business environment. The institute could attain the reputable position in the management education by following a holistic approach in providing the priming ground to budding business leaders.

### Introduction

Classrooms all over the world have gone through a massive transformation, from being teacher centric to student centric. Destinies of nations are shaped in classrooms. In fact, classrooms are the places where the future citizens of the country are reared, trained, educated and motivated to accept the emerging challenges and overcome those deftly. Management education is squarely criticized today for its overemphasis on analysis at the expense of skills related to managing and leading. Thus the onus is on the teachers to rethink the pedagogy and help evolve a new learning ecosystem. Building skills and competencies is at the heart of management education. Business education strives to train and nurture the ability to lead businesses, social institutions, government and entrepreneurial ventures. There is an urgent need of transforming classrooms into talent factories and skill labs.

The FDP – spread over five days – begins with reflecting on the art and science of management teaching; analyzing the role of a teacher and traverses through the use of important pedagogical tools of teaching – the case method, simulations, management games, videos and other visual aids, using ICT and other platforms like Skype in the class, using movies, assessment instruments. The program will conclude on using current affairs and news headlines in the class.

## Program Objective

This program would employ pedagogical tools and techniques towards sustaining learners' attention and enhancing their learning experience.

## Methodology

This program will be delivered using a rich and healthy mix of interactive sessions, research instruments, multi-media resources, experience sharing, case discussions and learn-by-doing techniques to help the participants to appreciate the role of various pedagogical tools that help translate learning into skill.

**For Whom:** Anyone engaged in business management teaching and training, particularly those teaching in business schools and universities. It will also be useful for those exploring unconventional pedagogical tools to teach conventional courses. This will particularly be useful for young teachers below the age of 40 years.

## Organizer

Institute of Management Technology, Nagpur, 35 KM Milestone,  
Dorli, Katol Road, Nagpur – 441 502
