DIRECTOR'S MESSAGE

I quote from the back cover of the book titled, 'Jonathan Livingston Seagull'.

For most seagulls, life consists simply of eating and surviving. Flying is just a means of finding food. However, Jonathan Livingston Seagull is no ordinary bird. For him, flying is life itself. Against the conventions of seagull society, he seeks to find a higher purpose and become the best at doing what he loves.

This is a fable about the importance of making the most of our lives, even if our goals run contrary to the norms of our flock, tribe or neighbourhood. Through the metaphor of flight, Jonathan's story shows us that, if we follow our dreams, we too can soar.

Good luck and fly high!

-Dr. Subhajit Bhattacharyya

My experience at IMT, Nagpur is completely awesome. The students here are very friendly, and they make you feel at home in a completely different country. The campus is beautiful with lots of verdant spaces. The campus of the college is designed in such a manner that it provides equal importance to sports as well as academics. The students are very participative. Indian culture is based on building a bond, sharing good moments etc.

Name : Melanie Profillet
College : Rennes School of Business

The campus is very attractive. According to me, the best part of the Indian culture is generosity and the welcoming nature of people. Here, people seem calm and happy. It is difficult to make a summary while there is still thousands of things to be lived, but at this moment, I do not want to return to France as I am feeling great in this country. But one thing is for sure, it is my first time in India, but not the last one!

It has been more than a month of my stay in IMT, Nagpur and I have learnt a lot from people, their culture and their tradition. It is just the beginning and the trip has showered me with unbelievable moments and experiences. The teachers have helped us in building our focus. Much to my surprise the people of India are welcoming and very helpful which is very rare to be seen in France. In one sentence I would say that by now, this is one of the best foreign experiences of my life and I am enjoying each day in this country.

The journey till now has turned out to be marvellous. The subjects are very interesting and different from what in France. Indian food is amazing and has a rich collection of spices. Here, I get to discover something new every day be it in terms of food or Indian culture. Until now my stay here is positive. The campus is very nice, people are very kind, food is really good, courses are interesting and we are in the middle of India so it will be easy to discover beautiful places.

Title: Good is the enemy of Great

Every great journey begins with the smallest step. Move ahead by setting small targets and constantly motivating yourself. However, self-motivation may not be enough in some cases. This is where your role models or mentors play a very crucial part. They may or may not be people you personally know.

Many of us face situations we do not like or want to get into, but none the less, we do it. Most of our lives are defined not by seeing things or experiencing them – rather they are defined by the literature we read and the literature we hear.

An artist whose creative thirst you quenched with the quivering lips of passion, Whose gory bits of soul lay splattered across the canvas of feelings, Testament to the fickle nature of love, or should I say unrequited love. But I will always smile and think, whilst you so lovingly stab my soul, how breathtakingly beautiful you are. I am never to speak to you, but I'll wait till the end of time, if that's what it takes, For one day O Harriet, I hope you might realize how lovingly I look upon you...

"The journey of a thousand miles begins with a single step".

The last two years have been like a voyage, where we braved huge waves, to reach Utopia. In the process, we discovered new lands but never lost sight of the shore. The journey has touched each one of us and drove us to push harder and aim higher.

On that note, the Corporate Communication Committee 2015-17 would like to thank the Institute of Management Technology, Nagpur for providing us an opportunity to work closely with professionals from corporate world and gain valuable insights in the process. We have learned leadership and teamwork along with interpersonal and communication skills which is essential to excel in the corporate world.

We would also like to take the opportunity to thank the faculty chairperson, Dr. Smita Dabholkar, along with Dr. Abhishek Singh for their continuous feedback and support. The committee has worked like a family, allowing us to understand each other better while growing as a team. The memories of the two years will be inexorably etched in us for the rest of our lives.
